CAMTC Law Regarding Unfair Business Practices

Students and graduates are advised to note CAMTC's Law related to unfair business practices as related to massage:

(1) Pursuant to California Business and Professions Code section 4611, It is an unfair business practice for a person to do any of the following:

- . (a) To hold himself or herself out or to use the title of "certified massage therapist" or "certified massage practitioner," or any other term, such as "licensed," "certified," "CMT," or "CMP," in any manner whatsoever that implies or suggests that the person is certified as a massage therapist or massage practitioner, unless that person currently holds an active and valid certificate issued by the California Massage Therapy Council.
- . (b) To falsely state or advertise or put out any sign or card or other device, or to falsely represent to the public through any print or electronic media, that he or she or any other individual is licensed, certified, or registered by a governmental agency as a massage therapist or massage practitioner.

Enrollment & Admission Requirements

Entrance in any of our training programs requires that a prospective student be at least 18 years of age. Students should have received a High School Diploma or GED, in good health, having no communicable disease, and be a United States resident. Each person is offered a campus interview. Each person is accepted if, in the school's opinion, that individual has the possibility of success in the chosen objective. Somatherapy Institute does not administer or use an ability-to-benefit exam to determine admission.

The practice of massage requires the ability to stand for an hour or more at a time, while working with your hands, arms, and back. If you have ever had any injuries to your legs, arms, or spine, consult your physician to assess your ability to perform massage.

There is currently a state certification for massage therapists in California. While many massage practitioners are licensed by the municipality where they work, most therapists are applying for state certification as well. The CAMTC was created to implement voluntary certification for the massage therapy profession. Those who have been certified by the CAMTC may practice throughout the state without need for additional local massage permits or licenses. Somatherapy Institutes encourages all students interested in enrolling and becoming massage therapists to consult the municipality where they plan to work to learn the business permit and massage permit requirements. This assists the student in planning the appropriate classes to meet the municipality's requirements.

English Language Policy

Somatherapy Institute is an English language school. All instruction occurs in English. We do not teach, recruit or offer tutorials in any other language, nor do we supply translators. The student must have the skills to understand the spoken word and read the course material with comprehension. Each student is required to understand and read English. English language proficiency is determined during the admissions process and determined by the student's admissions interview. Students may also be required to submit the results of either the TOEFL Internet-based Test (TOEFL iBT) or the Test of Spoken English (TSE) for determining English proficiency.

Exit Practical

Upon the completion of 545 hours of study, as the student prepares to apply for certification, the Director may require the student to perform an exit practical to determine competence. If the student fails the practical, they will be asked to perform more clinic hours before applying for State Certification.

Probations and Disciplinary Procedures

The Director coordinates disciplinary action. Grounds for disciplinary action:

Failure to maintain satisfactory academic progress

Failure to keep payments current

Failure to comply with Policies and Procedures outlined in Student Catalog

Failure to maintain satisfactory academic progress

The student's instructor will notify the Director when a student is not in compliance with academic requirements. The Director and instructor will determine whether counseling, an academic warning, probation, suspension, or dismissal is warranted. If dismissal is not warranted, the Director and instructor will determine the conditions under which the student will come back into compliance with academic requirements. This may include re-taking failed courses, modifying the student's schedule, make-up work, special projects/assignments, or additional testing. The goal is not punitive, but to provide an opportunity for the student to successfully complete the program.

Failure to keep payments current

This school is held accountable to the State government for fiduciary responsibility. It is irresponsible and unfair to other students to allow a student to continue taking classes if that student fails to meet his/her financial obligations. The Director and student will discuss the factors that are affecting the student's ability to pay his/her financial obligation and if necessary create a new payment schedule. If the new payment schedule is not adhered to, the Director will initiate disciplinary procedures, up to and including dismissal.

Failure to comply with Policies and Procedures outlined in Student Catalog

A student, instructor, or staff member must submit complaints regarding a student's conduct in writing to the Director. The director will notify the student that a complaint has been made and will give the student a copy of the complaint along with the specific policies that are at issue and potential sanctions. The student may respond to the complaint by submitting a written response to the Director within 5 business days of receiving the complaint.

The Director will investigate the complaint thoroughly, including interviewing all people and reviewing all documents that relate or may potentially relate to the complaint; and decide upon one of the following courses of action: dismiss the complaint, issue a warning to the student, or hold a disciplinary action hearing.

If the Director decides the complaint should be dismissed, The Director will write a letter to the person who made the complaint. If the Director determines that a warning should be issued, the Director will write a letter to the student that describes the warning and reminds the student that failure to heed the warning will be grounds for further action.

If the Director determines that a disciplinary action hearing should be held, the Director will convene a committee consisting of the director and two faculty members. The hearing shall be held within ten working days of receipt of the student's written response to the complaint. The Director may require that

the student discontinue attending classes until and during the hearing.

The hearing committee will review all written documents and schedule a hearing at which time the student may respond to the complaint. The committee shall determine whether the complainant's appearance at the hearing for questioning is required. The committee may also receive any other pertinent oral or written information at the hearing from other person within the school community. All information oral or written reviewed by the committee will be made available to the student for his/her response. The student may submit to the committee documents, information, and/or statements. This student is responsible for arranging the attendance of persons whom he/she wishes to attend as witnesses. The hearing committee may limit the number of persons attending the hearing.

The hearing is not a courtroom proceeding and therefore the rules that govern such proceedings do not apply. The hearing committee shall exercise reasonable control over the inquiry and presentation at the hearing in order to achieve the legitimate purpose of the hearing and to prevent intimidation or harassment of any person, which is contrary to the purpose of the hearing. An advocate may accompany the student at the meeting.

The committee may decide to dismiss the complaint, issue a warning to the student, place the student on probation, suspend or dismiss the student. The committee will notify the student of its decision within 10 working days of the hearing.

The Director will record a summary of the complaint, its disposition, and the reasons, place a copy of the summary in the student's file and make an appropriate entry in the student complaint log.

Probation means that a student may continue in the program for one academic quarter under specific probationary conditions, given to the student in writing by the Director.

Suspension means that a student must discontinue participation in the program for a specific period of time, indicated to the student in writing by the Director. Reinstatement may be requested in writing to the Director when the suspension period and all conditions of suspension have been met.

Dismissal means that a student must discontinue participation for a period of one calendar year from the date of dismissal.

Probation, suspension, or dismissal may be appealed as follows: Within 10 working days of the disciplinary action, the student must submit to the Director a written request for an appeal, describing the reasons for the appeal. Within 10 working days of receiving the appeal, the Director will convene an appeal committee consisting of two faculty members who have had no involvement in the original complaint or hearing. The appeal committee will review all related, written documentation, including the findings of the hearing committee, and will meet with the student to hear the student's concerns. An advocate may accompany the student and other parties may be requested to attend or send a written statement to the appeal committee. Within five working days of the appeal meeting, the committee will submit to the Director a written recommendation. The committee may recommend that the original decision for disciplinary action be upheld, that a different disciplinary action be taken, that no disciplinary action be taken, or require that there be a full rehearing by the same or a different committee.

Readmission after dismissal

Following a minimum of one year from the date of dismissal, a student must submit a request for readmission in writing to the Director. The Director will notify the student in writing whether or not the application for readmission has been accepted.
